## OBJECTIVE

---

Motivated and dedicated software engineer and student, seeking to transition full-time into the tech industry. Leveraging over eight years of supervisory experience, exceptional communication, and strong teamwork abilities to contribute to a dynamic and innovative tech environment.

---

---

## KEY SKILLS

### Leadership And Supervision

Successfully managed and supervised a team of correctional officers, ensuring adherence to procedures and maintaining a safe environment.

Demonstrated ability to lead by example, foster team collaboration, and handle conflict resolution quickly and effectively.

### Communication

Proven communication skills, both written and verbal, with the ability to convey complex information clearly and concisely.

Vast experience in effectively communicating with clients in high-stress environments and resolving issues and conflicts with professional effective communication.

Experience in delivering training sessions and briefings to staff, enhancing their understanding of protocols and procedures.

### Teamwork

Strong team player with a history of collaborating with colleagues to achieve common goals and improve operational efficiency.

Ability to work in high-pressure environments, contributing to a cohesive team dynamic.

### Problem Solving And Decision Making

Skilled in making quick, informed decisions in challenging situations, prioritizing safety, and operational effectiveness.

Experience in identifying potential issues and implementing proactive solutions to prevent incidents.

### Technical Skills

Proficient in programming languages such as Python, Java, C#, JavaScript, APIs.

Experience with version control systems (e.g., Git), database management, software development methodologies, Salesforce, Splunk, Datadog, and Sentry..

Basic understanding of software engineering principles, including object-oriented programming, algorithms, and data structures.
